

## 1 ABSTRACT OF THE DISCLOSURE

2 An intelligent method for allowing access to a computer files includes  
3 posing questions to a user. The questions are designed in accordance with the  
4 user's information, such as birthday, prior consumption data, and the user's  
5 information is designed via different transferring methods to increase the  
6 privacy of the question. Therefore, any hackers will have difficulty to find the  
7 correct answer to the question.
